EDUCATION

Bachelor of Technology in Artificial Intelligence & Machine Learning

PROFILE

Versatile Software Engineer with strong expertise in building desktop applications (EXE) and modern web solutions.
Highly skilled in Python-based development, web technologies, and AI-assisted engineering using tools like ChatGPT.
Experienced in converting ideas into fully functional software including EXE builds, web apps, automation tools,
and secure systems using AI-driven workflows.
Known for rapid development, problem-solving, and delivering
production-ready solutions using modern tools and best practices.

EXPERIENCE

Software Engineer, Independent Projects / Freelance
2023 – Present

- **Designed and developed multiple production-ready software solutions across desktop and web platforms**
- **Led development of CleanMaster Pro, a desktop application (EXE) built with Python and PyInstaller, featuring**
real-time scanning, secure licensing, and automated update mechanisms
- **Built and deployed web applications, including a personal portfolio website to showcase projects and technical work**
- **Utilized AI tools and ChatGPT extensively to accelerate development, debugging, and architectural decision-making**
- **Created AI-assisted automation tools and custom utilities to solve practical, real-world problems**
- **Managed complete software development lifecycle from concept, development, and testing to deployment and maintenance**
